1. No aircraft were parked at the STENDAL-BORSTEL (M 53/Y 75) airfield. The hangars were closed. The radio station previously located at the southern edge of the field had been dismantled. The airfield was guarded by air force soldiers. According to local residents, the fighter unit previously stationed at the field had been transferred.

6 September 1949

2. Sixteen single-engine, low-wing monoplanes with in-line engine, rounded-off wing tips and retractable landing gear were parked in front of the hangars. Since aircraft of the same type were previously stationed at the field it could not be ascertained whether or not these had newly arrived. There was stunt flying.

25X1C Trucks [REDACTED] were observed.10 September 1949

3. One twin-engine plane was parked at the field between 4 p.m. and 7 p.m. in which four air force officers had arrived, apparently for an inspection.

25X1A [REDACTED] Comment:

It is assumed that the fighter unit previously stationed in STENDAL was transferred to CRANIEBURG, since shipments from STENDAL to CRANIEBURG were dispatched by [REDACTED] between 6 and 10 September 1949. + It has not been learned whether the aircraft observed at the field on 6 September 1949 had newly arrived. The reported motor vehicle numbers have been previously observed in STENDAL.
